

World concern

8/9/15

WHY DO WE USE PLASTIC?

Did you know?

We have been using plastic for over fifty years and our environment is starting to get really hurt from the pollution.

If we don't stop using plastic bags the environment will become polluted.

Today over 1 trillion plastic bags are used every year and 1 million bags per minute. **THAT'S A PLASTIC CATASTROPHE!!!**

So now you know to bring your own green bags and we will go along way in the future.
