Recycle More

Why should we recycle ?

If we recycle there would be a much healthier planet and our pets and children will have a happier and healthier world.

If we don't recycle it will harm our environment and it will be like a world covered in waste for our children.

If we recycle we could prevent plastic poison.

Recycling is one of the best things we can do for our environment because we are cleaning up all of our re-useable items.

If we don't recycle we will have a disgusting environment and we will never learn to be tidy and clean.
